

# STAFF MEETINGS

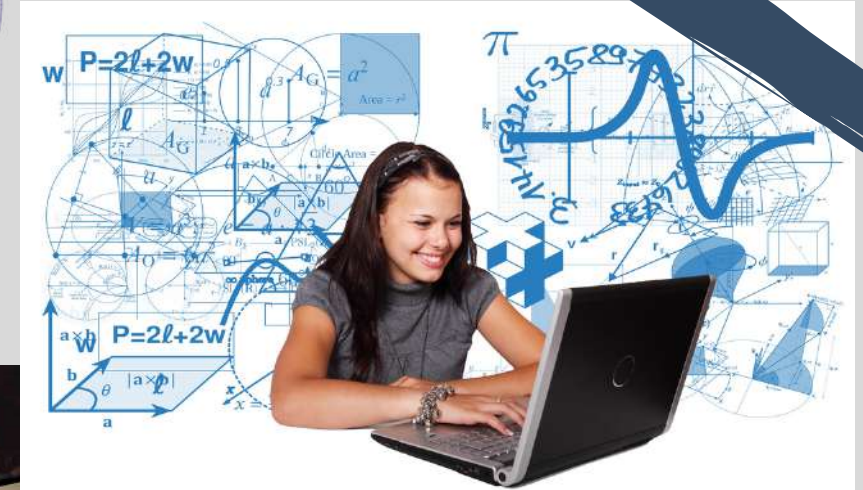

Maths Packages  
Available for Schools

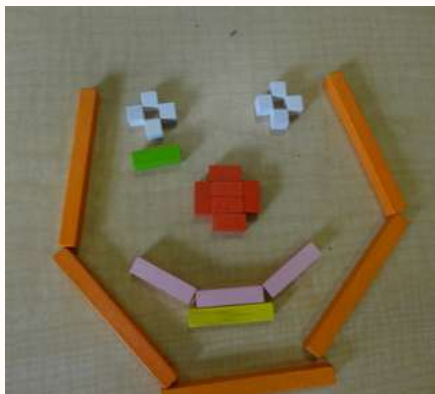

# WHAT WE OFFER

The Primary Learning Team offers a wide range of bespoke in-school support across all areas of the curriculum, working alongside you to bring about improvement in teaching, learning and leadership.

We are able to tailor any of this menu to your requirements and most support can be offered on a whole school, key stage, year group or one to one basis; during the school day, in a staff meeting or twilight or as INSET

# SUPPORTING HIGH QUALITY TEACHING

## Using Manipulatives

This session provides opportunities to use a variety of mathematics apparatus and understanding their value in enabling children to develop conceptual understanding.

## Basic Skills

This session will support staff to identify the basic skills children need in order to become fluent mathematicians. This highly practical session will allow staff time to try out activities and games which can be used in the classroom.

Finding a way through:  
Effective use of the bar  
model

## Bar Modelling

This training will explore how the bar model supports pupils to embed problem solving strategies and develop fluency, reasoning, problem solving and conceptual understanding.

# DEVELOPING SUBJECT KNOWLEDGE

## Number and Place Value

This session will explore the development of map skills from EYFS to Year 6. It will include how to develop children's skills in the use of maps, atlases, aerial views, OS maps and grid references.

## Developing Multiplication

This session will explore what effective fieldwork looks like progressively through a school. It will unpick the expectations of the National Curriculum and explore how to ensure effective coverage.
